

1/7

A comparison of rates of hydrolysis and aminolysis of copolymers P-Akap-TT and P-GlyGly-ONp in HEPES buffer at pH 8.0, ♦ P-Akap-TT hydrolysis, ◇ P-Akap-TT aminolysis, ▲ P-GlyGly-ONp hydrolysis, △ P-GlyGly-ONp aminolysis

Fig. 1

2/7

A comparison of synthesis of polymers with TT and ONp groups (X is an oligopeptide spacer between polymer and drug)

Fig. 2

3/7

Biological activity of classic BS-RNase conjugate 1 and star BS-RNase conjugate 2 in treatment of human melanoma in nu-nu mice

Fig. 3

4/7

Survival periods of experimental mice in therapeutical mode treated with conjugates prepared according to Examples 5 and 6

Δ control, ◆ DOX, □ P-Gly-DL-PheLeuGly-DOX  
 ○ P-Gly-DL-PheLeuGly-DOX(hIgG), ● P-GlyPheLeuGly-DOX(hIgG)
